Installation Guide

Installing the Schlage Co 100 may seem daunting, but with the right tools and guidance, it can be a straightforward process. Below are the steps to follow for a successful installation.

Tools Required

Before beginning the installation, gather the following tools:

- Phillips screwdriver
- Flathead screwdriver
- Drill (if necessary)
- Measuring tape

- Level

Step-by-Step Installation Process

1. Prepare the Door: Ensure that your door is compatible with the Schlage Co 100. The door should be between 1-3/8 inches and 1-3/4 inches thick.
2. Remove Existing Hardware: If you are replacing an old lock, remove it completely. This may involve unscrewing the lockset and removing the strike plate.
3. Mark the Door: Use the measuring tape to mark the center of the door for the lock installation. This is typically 2-3/8 inches from the edge of the door.
4. Drill Holes: If necessary, drill holes for the lock according to the manufacturer's specifications. Ensure that the holes are straight and accurate.
5. Install the Lock Body: Insert the lock body into the hole you just drilled, ensuring that it is flush against the door.
6. Attach the Exterior Keypad: Align the exterior keypad with the lock body and secure it in place using screws.
7. Install the Interior Assembly: Attach the interior assembly to the lock body. Make sure to align the components properly to ensure smooth operation.
8. Install the Strike Plate: Position the strike plate on the door frame and mark the screw holes. Drill holes as necessary, and attach the strike plate.
9. Test the Lock: Before finalizing the installation, test the lock to ensure that it functions correctly. Enter the default code and ensure that the lock engages and disengages properly.

Programming the Schlage Co 100

One of the standout features of the Schlage Co 100 is its programmable keypad. Here's how to set it up:

Default Code

The Schlage Co 100 comes with a default code, typically set to 1234. This should be changed immediately for security purposes.

Programming New Codes

1. Enter the Programming Mode: Press the "Program" button located on the interior side of the lock.
2. Enter the Default Code: Input the default code to access programming mode.
3. Create a New User Code: After entering the programming mode, follow the prompts to enter a new user code. You can typically program up to 20 unique codes.
4. Finalize the Programming: Once you have entered the new code, confirm it by pressing the "Enter" button.

Troubleshooting Common Issues

While the Schlage Co 100 is a robust lock, you may encounter some issues. Here are common problems and their solutions:

Lock Not Responding

- Check Battery: Ensure that the batteries are not dead. Replace them if necessary.
- Reset the Lock: If the lock is unresponsive, perform a factory reset by following the instructions in the manual.

Error Messages on Keypad

- Incorrect Code: If you receive an error message, ensure that you are entering the correct code. Remember that the keypad is case-sensitive.
- Lock Tampering: If the keypad shows a tamper error, wait for a few minutes and try again.

Physical Resistance When Turning the Handle

- Misalignment: Check if the lock is properly aligned. Adjust as necessary.
- Debris: Inspect the lock for dirt or debris that may obstruct movement. Clean as needed.

Maintenance Tips

To ensure that your Schlage Co 100 functions optimally, regular maintenance is key. Here are some maintenance tips to consider:

- Regularly Test the Lock: Periodically check that the lock engages and disengages smoothly.
- Change Batteries Annually: Even if the batteries appear to be functioning, it's good practice to replace them once a year.
- Clean the Keypad: Use a soft cloth to clean the keypad and remove any debris that may accumulate.
- Lubricate Moving Parts: Occasionally apply a silicone-based lubricant to the moving parts to maintain smooth operation.
