It assesses candidates' knowledge of Scrum principles, roles, events, and artifacts as defined by the Scrum Alliance. The test typically consists of multiple-choice questions designed to evaluate understanding of Scrum framework application in real-world scenarios. Achieving a passing score on this exam demonstrates a candidate's readiness to lead Scrum teams effectively. The exam format encourages practical comprehension rather than rote memorization, focusing on how Scrum values and practices drive project success.

Test Format and Structure

The CSM test usually includes 50 multiple-choice questions that must be completed within 60 minutes. Candidates are required to score at least 74% to pass. The questions cover a wide range of topics including Scrum roles, sprint planning, product backlog management, and Scrum events such as daily stand-ups and retrospectives. The test is administered online, enabling flexible scheduling and accessibility. Understanding the exam structure helps candidates allocate their time wisely and approach questions systematically.
