Preparation Before Use

Before using a condom, it is important to check the expiration date and ensure the package is intact without any tears or damage. Using a damaged or expired condom can compromise effectiveness. Additionally, proper storage away from heat and sharp objects preserves the condom's integrity.

Steps to Proper Condom Application

1. Open the condom package carefully to avoid tearing the condom with nails or teeth.
2. Pinch the tip of the condom to leave space for semen collection and prevent air bubbles.
3. Place the condom on the head of the erect penis.
4. Roll the condom down the shaft of the penis all the way to the base.

6. Dispose of the used condom safely in the trash; do not flush it.

Following these steps ensures the condom functions correctly, aligning with responsible sexual behavior highlighted by the phrase **stepsister needs help with condom practice s29e3 angel gostosa**.
