The Syracuse University occupational therapy program is designed to provide students with a rigorous and holistic education in occupational therapy. Accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), the program ensures that graduates meet the highest standards of professional competency. The program focuses on preparing students to evaluate, intervene, and promote health and participation in daily activities for individuals facing physical, cognitive, or emotional challenges. Syracuse University's commitment to inclusivity and diversity enriches the learning environment,

fostering cultural competence among future occupational therapists. The program's integration within a broader health sciences framework supports interdisciplinary collaboration and a comprehensive understanding of complex health conditions.

Program Mission and Vision

The mission of the Syracuse University occupational therapy program is to educate and empower students to become compassionate, skilled practitioners who contribute to improving health and well-being across the lifespan. The vision emphasizes leadership in education, research, and community partnership to advance the profession of occupational therapy both locally and globally. Ethical practice, lifelong learning, and advocacy are core values embedded throughout the curriculum and clinical experiences.

Faculty Expertise and Resources

The program benefits from a team of experienced faculty members who are leaders in occupational therapy education, research, and clinical practice. Faculty members bring diverse expertise in areas such as neurological rehabilitation, pediatrics, assistive technology, mental health, and aging. Students have access to advanced simulation labs, research centers, and community-based facilities, providing a supportive and resource-rich environment for learning and professional growth.

Academic Curriculum and Learning Experience

The academic curriculum in Syracuse University occupational therapy is structured to balance theoretical knowledge with practical application. The program offers both entry-level master's and doctoral degrees in occupational therapy, tailored to develop clinical reasoning, evidence-based practice, and leadership skills. Coursework encompasses human anatomy, kinesiology, neuroscience, therapeutic techniques, and professional ethics.

Core Courses and Specializations

Students engage in a series of core courses that lay the foundation for occupational therapy practice, including:

- Occupational Therapy Foundations and Principles

- Human Development and Behavior
- Therapeutic Interventions and Modalities
- Assistive Technology and Environmental Adaptation
- Health Promotion and Wellness
- Research Methods and Evidence-Based Practice

In addition to core courses, students may pursue specialized electives to deepen their expertise in areas such as pediatric therapy, gerontology, or mental health.

Experiential Learning and Interprofessional Education

Syracuse University occupational therapy emphasizes experiential learning through simulations, case studies, and collaborative projects with other health disciplines. This approach enhances critical thinking and communication skills essential for effective patient-centered care. Interprofessional education initiatives prepare students to work seamlessly within healthcare teams, promoting holistic and coordinated treatment plans.

Admission Requirements and Application Process

Admission to the Syracuse University occupational therapy program is competitive and requires candidates to demonstrate academic excellence, relevant experience, and a commitment to the profession. The program seeks applicants who possess strong interpersonal skills, a passion for helping others, and a foundation in the sciences.

Academic Prerequisites

Applicants must have completed a bachelor's degree with prerequisite coursework in areas such as biology, psychology, anatomy, physiology, and statistics. Maintaining a high GPA, particularly in science-related courses, strengthens the application.

Application Components

The application process typically includes the following components:

1. Official transcripts from all post-secondary institutions attended
2. Graduate Record Examination (GRE) scores (if required)
3. Letters of recommendation from academic or professional references
4. Personal statement outlining motivation for pursuing occupational therapy
5. Resume or curriculum vitae highlighting relevant experience
6. Interview with the admissions committee

Early application is encouraged due to limited enrollment capacity and high demand for the program.
