1. **Guessing:** Players input a five-letter word as a guess.
2. **Feedback:** Each letter is highlighted in one of three colors:
 - Green: The letter is in the correct position.
 - Yellow: The letter is in the word but in the wrong position.
 - Gray: The letter is not in the word at all.
3. **Attempts:** Players have six attempts to guess the correct word.

Effective Strategies for Wordle

To become a Wordle master, players need to adopt specific strategies that enhance their guessing abilities. Here are some effective tactics:

1. Start with a Strong First Word

The first guess sets the tone for the rest of the game. Choose a word that contains common vowels and consonants. Some excellent starting words include:

- ARISE
- SAINT
- CRANE
- SLATE

These words have a good mix of common letters that can provide maximum feedback on your first attempt.

2. Analyze Feedback Carefully

After your first guess, take a moment to analyze the feedback. Here's how to do it:

- Identify Green Letters: These letters are in the correct position. Keep them fixed in future guesses.
- Track Yellow Letters: These letters are in the word but misplaced. Make sure to include them in your next guesses but in different positions.

- Eliminate Gray Letters: These letters do not belong in the word, so avoid using them in subsequent attempts.

3. Use Process of Elimination

As you receive feedback from each guess, use the process of elimination to narrow down potential letters and their positions. Keep track of letters that you know are not part of the word and adjust your guesses accordingly.
