1. Start with Common Letters

When entering your first guess, choose words that include frequently used letters such as E, A, R, and T. This increases your chances of hitting correct letters early on.

2. Use Vowels Wisely

Vowels are essential in forming words. Including multiple vowels in your initial guesses can help you quickly identify the letters present in the target words.

3. Analyze Feedback Carefully

Take note of the feedback from your guesses. If a letter is highlighted in yellow, consider its possible placement in the other words. Keep track of which letters have been ruled out and adjust your guesses accordingly.

4. Eliminate Incorrect Options

As you progress, eliminate options that contain letters you know to be incorrect. This method streamlines your guesses and focuses your efforts on more viable possibilities.
