Yitty Bra Size Guide

Finding the perfect bra can be a daunting task, especially with the myriad of options available in the market. Yitty, a brand founded by the renowned Lizzo, aims to redefine body positivity and inclusivity in the intimates industry. Understanding your bra size is essential to ensure comfort, support, and confidence. This comprehensive Yitty bra size guide will help you navigate through the sizing system, how to measure yourself, and tips for finding the right fit.

Understanding Bra Sizes

Bra sizes are typically denoted by a combination of letters and numbers. The number represents the band size, which is the circumference of your torso just under your bust, while the letter denotes the cup size, which indicates the volume of your breast.

How Bra Sizes Work

- Band Size: This is the number portion of a bra size (e.g., 32, 34, 36). It is determined by measuring around your ribcage under your bust.
- Cup Size: This is the letter portion (e.g., A, B, C, D). It indicates the difference between your bust measurement and your band size.

For example, a 34B means the band measurement is 34 inches, and the cup size represents a certain volume that corresponds to that band size.

Measuring for Your Bra Size

To find your correct Yitty bra size, follow these simple steps to measure yourself accurately.

Step 1: Measure Your Band Size

1. Wear a Comfortable Bra: It's best to measure while wearing a lightly lined or braless state for accuracy.
2. Use a Soft Measuring Tape: Wrap the tape around your ribcage, just under your bust. Make sure it's snug but not too tight.
3. Round to the Nearest Whole Number: If you get an odd number, round up to the nearest even number.

Step 2: Measure Your Bust Size

1. Measure Over the Fullest Part of Your Bust: Stand straight and wrap the measuring tape around the fullest part of your breasts, ensuring it's level at the back.
2. Keep it Comfortable: The tape should be snug but not constricting.

Step 3: Calculate Your Cup Size

1. Subtract your band size from your bust size:
 - If your bust measurement is 36 inches and your band size is 34 inches, the difference is 2 inches.
2. Determine your cup size:
 - 1 inch = A cup
 - 2 inches = B cup
 - 3 inches = C cup
 - 4 inches = D cup
 - 5 inches = DD/E cup
 - 6 inches = DDD/F cup

Using the example above, a 34 band size with a 36 bust measurement results in a 34B size.

Tips for Ensuring the Perfect Fit

Finding the perfect Yitty bra goes beyond just knowing your size. Here are some tips to ensure a comfortable fit:

Check the Band Fit

- The band should be snug but not so tight that it causes discomfort.
- It should sit level around your body, without riding up.

Assess the Cup Fit

- Your breasts should fill the cups without spilling over.
- There should be no gaps or bulges; if there are, you may need to adjust your size.

Try Different Styles

- Don't hesitate to experiment with various styles and designs to find what feels best for you.
- Each style may fit differently, so it's essential to try them on.

Common Bra Fit Issues

Even with the right size, some issues may arise. Here are a few common problems and solutions:

1. Underwire Digging Into Your Skin

- This may indicate that the band size is too small. Try going up a band size.

2. Spillage Over the Cups

- If there's spillage, you may need to go up a cup size for better coverage.

3. Gaps in the Cups

- This can happen if the cup size is too large. Consider going down a cup size.
